## **DETAILED ACTION**

## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - Claims 1-6, drawn to a system for applying reinforcing rings, classified in class 156, subclass 580.
  - II. Claims 7-10, drawn to a reinforcer dispensing assembly, classified in class156, subclass 514.
- Inventions are distinct, each from the other because of the following reasons:

  Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the subcombination contains limitations directed to a collar and a ratchet arm which are not recited in the combination claims. The subcombination has separate utility such as hole punch.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Application/Control Number: 10/765,747

Art Unit: 1734

4. Applicant is advised that the reply to this requirement to be complete must

include an election of the invention to be examined even though the requirement be

traversed (37 CFR 1.143).
